2024

PT Batavia Prosperindo Aset Manajemen

Generated 25-11-2024

About this report

PRI reporting is the largest global reporting project on responsible investment. It was developed with investors, for investors.

PRI signatories are required to report publicly on their responsible investment activities each year. In turn, they receive a number of outputs, including a public and private Transparency Report.

The public Transparency Reports, which are produced using signatories' reported information, provide accountability and support signatories to have internal discussions about their practices and to discuss these with their clients, beneficiaries, and other stakeholders.

This public Transparency Report is an export of the signatory's responses to the PRI Reporting Framework during the 2024 reporting period. It includes the signatory's responses to core indicators, as well as responses to plus indicators that the signatory has agreed to make public.

In response to signatory feedback, the PRI has not summarised signatories' responses – the information in this document is presented exactly as it was reported.

For each of the indicators in this document, all options selected by the signatory are presented, including links and qualitative responses. In some indicators, all applicable options are included for additional context.

Disclaimers

Legal Context

PRI recognises that the laws and regulations to which signatories are subject differ by jurisdiction. We do not seek or require any signatory to take an action that is not in compliance with applicable laws. All signatory responses should therefore be understood to be subject to and informed by the legal and regulatory context in which the signatory operates.

Responsible investment definitions

Within the PRI Reporting Framework Glossary, we provide definitions for key terms to guide reporting on responsible investment practices in the Reporting Framework. These definitions may differ from those used or proposed by other authorities and regulatory bodies due to evolving industry perspectives and changing legislative landscapes. Users of this report should be aware of these variations, as they may impact interpretations of the information provided.

Data accuracy

This document presents information reported directly by signatories in the 2024 reporting cycle. This information has not been audited by the PRI or any other party acting on its behalf. While this information is believed to be reliable, no representations or warranties are made as to the accuracy of the information presented. The PRI has taken reasonable action to ensure that data submitted by signatories in the reporting tool is reflected in their official PRI reports accurately. However, it is possible that small data inaccuracies and/or gaps remain, and the PRI shall not be responsible or liable for such inaccuracies and gaps.

SENIOR LEADERSHIP STATEMENT

SENIOR LEADERSHIP STATEMENT

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
SLS 1	CORE	N/A	N/A	PUBLIC	Senior Leadership Statement	GENERAL

Section 1. Our commitment

- Why does your organisation engage in responsible investment?
- What is your organisation's overall approach to responsible investment, and what major responsible investment commitment(s) have you made?

We realize there is a growing awareness in world markets of the value in responsible investing and our commitment to work towards global standards. We believe there is a link between ESG factors and the financial performance of listed companies and as such considers ESG criteria throughout its investment management approaches which ultimately determine the selection and management of our entire investment universe across all asset classes (i.e. money market, fixed income and equity). As part of our commitment to the principles of responsible investment, we are also a registered signatory to the UN PRI since February 2016. Our approach includes screening of companies operating in sectors on our exclusions list and for companies operating in sectors we have determined to be high risk. High-risk companies are then evaluated to identify any additional monitoring requirements/needs through a series of due diligence questions covering Environmental, Social and Corporate Governance factors. Our exclusion list defines the sectors/companies in which we will not invest. The exclusion list is applicable to all classes of Indonesian Stock Exchange (IDX) publicly listed shares and all classes of IDX listed companies issued debt.

Section 2. Annual overview

- Discuss your organisation's progress during the reporting year on the responsible investment issue you consider most relevant or material to your organisation or its assets.
- Reflect on your performance with respect to your organisation's responsible investment objectives and targets during the reporting year. Details might include, for example, outlining your single most important achievement or describing your general progress on topics such as the following (where applicable):
 - refinement of ESG analysis and incorporation
 - stewardship activities with investees and/or with policymakers
 - collaborative engagements
 - attainment of responsible investment certifications and/or awards

Having integrated our ESG policy into our investment process in Q3 2015 and becoming a signatory to UNPRI in February 2016, we have launched an Indonesia ESG ETF in March 2019; Indonesia's first ESG actively-managed equity fund in September 2019; Indonesia's first USD sharia global ESG fund under BlackRock's technical advisory in January 2021; and Indonesia's first USD sharia China impact fund under BlackRock's technical advisory in November 2021.

Section 3. Next steps

- What specific steps has your organisation outlined to advance your commitment to responsible investment in the next two years?

We have seen increasing level of ESG awareness and ESG-focused products the past couple of years. In both our passive and active ESG strategies, we have seen appetite and subscription from a mix of foreign and local insurance companies, several pension funds, foundations as well as the government-mandated employment social security program. In addition, we have seen increasing appetite from the Distribution Partners to onboard ESG-focused products.

Our strategy to showcase our ESG capabilities and advance our commitment to responsible investment and in-house ESG Policy is to continue to increase awareness across our clients and Distribution Partners that we are one of the first asset management companies in Indonesia to become a UNPRI signatory and educate them on how we integrate ESG into our entire investment process. We endeavour to help identify ESG product ideas that can sustainably add value to their overall portfolio in the hope of potentially increasing demand for more ESG-focused products in the future.

OO 15	CORE	OO 11, OO 12–14	N/A	PUBLIC	ESG in other asset classes	1

Describe how your organisation incorporates ESG factors into the following asset classes.

Internally managed
(C) Other

We integrate ESG factors in selection and management of our placement bank and bond universe. Our approach includes screening of companies operating in sectors on our exclusions list and for companies operating in sectors we have determined to be high risk. High-risk companies are then evaluated to identify any additional monitoring requirements/needs through a series of due diligence questions covering Environmental, Social and corporate Governance factors.

Our exclusion list defines the sectors/companies in which we will not invest. The exclusion list is applicable to all classes of IDX listed companies issued debt and publicly-offered debt issued by non-listed companies.

Internally managed
(A) Listed equity – passive

Our passive equity funds/products are designed and mandated to mimic a particular index.

(E) Fixed income – SSA

We do not incorporate ESG factors into the investment process for Government Bonds as we are unable to quantify and assess the ESG risks of the Indonesian Government relative to other peer countries as we currently only invest in domestic fixed income securities including Government Bonds.

We integrate ESG factors in selection and management of our investment universe. Our approach includes screening of companies operating in sectors on our exclusions list and for companies operating in sectors we have determined to be high risk. High-risk companies are then evaluated to identify any additional monitoring requirements/needs through a series of due diligence questions covering Environmental, Social and Corporate Governance factors.

Our exclusion list defines the sectors/companies in which we will not invest. The exclusion list is applicable to all classes of Indonesian Stock Exchange (IDX) publically listed shares and all classes of IDX listed companies issued debt.
